

ADVANTAGE Virtualization Services

for DATA CENTERS & CLOUD INFRASTRUCTURES

SRA OSS offers advanced services to help consolidate and migrate the current Server and Application infrastructure to the next generation of Virtualization in data centers for Enterprises and Managed Service Providers. These offerings are called ADVANTAGE services developed based on unique and proven methodology for our customers.

SRA Desktop Application Assessment

Overview

- The VMware Desktop Application Virtualization Assessment is an on-site consulting engagement to help you fully leverage the benefits of application virtualization.
- This service will help you identify which Microsoft Windows-based applications in your environment are the best candidates for virtualization.
- This is the first step to determine where you will see the maximum benefit of this technology.

Methodology

SRA Consultants will follow a four-phase approach as they work with your organization:

1. **Interview**—Determine and document business drivers, project and technical requirements.
2. **Collect**—Collect inventory, usage, and performance data regarding desktop inventory, end user, and application environments using a combination of assessment questionnaires, VMware tools, and third party toolsets.
3. **Analyze**—Apply project requirements to current environment and perform Gap Analysis, Application & User Analysis.
4. **Report**—Create and provide to customer written documentation and the assessment report.

Deliverables

Upon conclusion of this engagement, VMware Consultants will deliver the following:

1. Detailed Assessment report containing:
 - A summary of discovered applications.
 - An itemized list of which users and applications are appropriate for virtualization.
 - A high level forecast of the requirements to adopt application virtualization technology.
2. Application specific profiles and virtualization recommendations, including:
 - Load and usage profiles.
 - Candidacy for app virtualization,
 - Level-of-effort to implement virtualization.
3. A high-level roadmap, recommended infrastructure changes, application virtualization prioritization and next steps.

ADDITIONAL SERVICES

Data Center Services

- Planning
- Design
- Deployment
- Architecture
- Operations
- NOC Support
- Multi-Vendor Support
 - Cisco
 - HP
 - IBM
 - ORACLE
 - EMC
 - VMware

Business Processes

- Policies and Standards
- Risk and Compliance
- ITIL and ITSM

Security Services

- Vulnerability Assessment
- Remediation

Virtualization

- Consolidation
- Migration

Disaster Preparedness

- Backups
